In the light of the provisions of Section 363 read with Section 361 of the Indian Penal Code, the first question that arises for consideration is as to whether the age of the victim was under eighteen years at the time of the incident so as to fall within the ambit of Section 361 of the Indian Penal Code. The evidence on record reveals that a school leaving certificate came to be produced at Exhibit 20 wherein the birth date of the victim is shown to be 5<sup>th</sup> October, 1982. In the present case, the alleged offence is stated to have been committed on 6<sup>th</sup> March, 1999. Therefore, if the age of the victim is computed on the basis of the age as stated in the school leaving certificate, she is clearly below eighteen years of age. However, the record further reveals that prior to getting married to the accused, an ossification test of the victim and the accused had been carried out which reveals that the age of the victim was nineteen years. Subsequently, a medical test of the victim came to be carried out and as per the medical report (Exhibit 13), the victim was nineteen years of age. The trial court, in the impugned judgment has chosen to place reliance upon the medical report rather than school leaving certificate. What is required to be, therefore, examined is as to whether the trial court was justified in giving more weightage to the medical certificate at Exhibit-13 rather than the school leaving certificate. The record reveals that the school leaving certificate at Exhibit 20 has been produced on record by one Ranjanben Girdharbhai Upadhyay, Assistant Teacher at the Kashibai Vijkorbai Girls School No. 1, Rajula. The said witness has deposed that the date of birth of the victim as entered in the school register is 5<sup>th</sup> October, 1982.
